(a) No person, including a Government operated establishment, may accept delivery of any coke if his inventory of it is or will by virtue of such acceptance become more than he expects to use during the succeeding twenty days on the basis of his current or scheduled method and rate of operation.

(b) This direction does not apply to:

(1) Coke which on the effective date of this direction was billed or in transit;

(b) Nothing contained in this order shall be deemed to relieve Max Horowitz and Esther Horowitz from any restriction, prohibition, or provisions contained in any other order or regulation of the War Production Board except insofar as the same may be inconsistent with the provisions hereof.

[Utilities Order U-10, as Amended Nov. 6, 1945]

CONSERVATION OF COAL BY MANUFACTURED GAS UTILITIES

The fulfillment of requirements for the defense of the United States has created a shortage in the supply of coal for defense, for private account and for export; and the following order is deemed necessary and appropriate in the public interest and to promote the national defense.

§ 4500.66 *Utilities Order U-10—(a) Purpose of the order.* The purpose of this order is to save coal by reducing the amount used in producing manufactured gas.

(3) "Non-utility producer" means any person who owns or operates any manufactured gas production or transmission facilities and who is not included in the

definition of "utility" in paragraph (b) (2).

(4) "Consumer" means any ultimate user of manufactured gas produced, transmitted or distributed by any utility or by any non-utility producer which is interconnected with any utility.

(5) "Manufactured gas" means any combustible gas produced by any manufacturing process (other than liquefied petroleum gas unmixed with any gas produced by any other manufacturing process).

(6) "Standby facilities" means equipment designed to use another fuel to replace gas, and for the operation of which a supply of fuel is available or obtainable.

(c) *Restriction on use of coal gas facilities.* (1) Each utility and each non-utility producer shall conserve coal by the employment of all practical methods.

PART 1315—RUBBER AND PRODUCTS AND MATERIALS OF WHICH RUBBER IS A COMPONENT

[MPR 478, Amdt. 10]

COATED AND COMBINED FABRICS

A statement of the considerations involved in the issuance of this amendment, issued simultaneously herewith, has been filed with the Division of the Federal Register.

Maximum Price Regulation 478 is amended in the following respects:

A new section designated section 15a is added to read as follows:

SEC. 15a. *Industry-wide adjustments for reconversion products.* Special pricing provisions applicable to particular products may be established by orders issued under this section when, with respect to the product, the Administrator finds:

(a) That in 1944 its production was approximately one-half or less of its production in its last representative period of peacetime production;

(b) That this reduction in dollar volume resulted from (1) governmental restrictions on the manufacture of products or on the use of materials, facilities, or manpower, or (2) the use of facilities for the production of war goods, or (3) other direct needs of the war effort; and

(c) That because of change in government restrictions or in the needs of

the war program, manufacturers of the product generally are able to begin or to increase substantially the production of the product line.

If in the judgment of the Administrator, the purposes of this section will be effectuated, as to a particular product, without any special pricing provisions, an order under this section will not be issued with respect to that product even though the above findings could be made as to it.

Orders under this section, will generally authorize industry-wide increases in the established maximum prices of manufacturers in those industries, based upon surveys conducted by the Price Administrator, either upon the request of the particular industry or upon his own motion. Those orders will establish adjusted maximum prices or methods of determining such prices by the use of price increase factors. Where, however, in the judgment of the Price Administrator, the use of an industry-wide factor will, by reason of the diversity in the products made by the member firms, the wide variation in cost experience among them, or other reasons, be an inequitable and inappropriate means of establishing reconversion prices, he may provide for the calculation and application of individual price increase factors.

Broadly stated, the new maximum prices will represent costs experienced during the last period of normal production adjusted for subsequent lawful changes in the level of materials prices and in basic wage rate schedules of factory workers, plus the industry's average peacetime profit margin over cost. Changes in materials prices may be measured by materials cost increase factors, determined by the Administrator, in those cases where such action may be necessary to eliminate temporary or artificial influences. In the case of an industry for which the Administrator has decided that price increase factors should be determined and applied for each firm, the profit element in each increase factor will be the firm's own base period profit margin or one-half of the industry's average peacetime margin, whichever is the higher.

Orders issued under this section may also modify or supersede the provisions of Maximum Price Regulation No. 478 with respect to the establishment of maximum prices, if, on the basis of the particular characteristics of the industry involved, the Administrator finds that another method of price determination will effectuate the purposes of this regulation better than the general pricing provisions of the regulation. In addition, those orders may establish new maximum prices or a method of determining new maximum prices for sales by persons other than manufacturers which will supersede maximum prices fixed by other regulations for such sales and which will be consistent with the standards applied by the Office of Price Administration for the reasonable absorption of necessary cost increases.

Orders issued under this section will not ordinarily reduce higher maximum prices which manufacturers have pre-

viously established in accordance with the applicable provisions.

A manufacturer of a product covered by an order issued under this section may not obtain an adjustment of his maximum prices under any adjustment provision other than Supplementary Orders Nos. 118 and 119, unless the adjustment provision itself or the order issued under this section covering his product expressly provides otherwise.

Small volume manufacturers may use as their new maximum prices those which they calculate under Supplementary Order No. 118, and general orders issued pursuant thereto, if the maximum prices so calculated are higher than maximum prices set under orders issued under this section. Any other manufacturer may apply for an individual adjustment under Supplementary Order No. 119 if, after the adjustment authorized for his industry by an order under this section, his maximum price still continues eligible for adjustment in accordance with the provisions of that supplementary order.

Orders issued under this section may require a manufacturer to arrange the production and distribution of his products so that they will be representative of his production and distribution in a specified past period for goods in a particular category. The Administrator may also require authorized price increases to be applied among articles or price lines in a manner consistent with the need, under the stabilization program, to maintain the production of lower-priced articles.

This amendment shall become effective November 10, 1945.

Issued this 6th day of November 1945.

CHESTER BOWLES,
Administrator.

A statement of the considerations involved in the issuance of this Amendment, issued simultaneously herewith, has been filed with the Division of the Federal Register.

A new § 1346.104 (a) (1) (e) is added to read as follows:

(e) The maximum price determined pursuant to the above pricing method may be increased by a manufacturer meeting the conditions set forth below by an amount not in excess of \$0.10 per barrel when the following conditions are met:

The sale is made f. o. b. a mill located within the geographical area defined herein; or

The sale is made on a delivered basis and the delivered destination point is within the geographical area defined herein.

The geographical area referred to herein is defined to be the States of Georgia, Alabama, Tennessee, Louisiana, Mississippi, North Carolina, South Caro-

lina, Florida, that portion of Virginia east of and including the Counties of Bland, Wythe and Grayson and south of and including the Counties of Frederick, Clark, Fauquier, Culpeper, Spotsylvania and King George.

Any manufacturer who has increased his maximum selling prices of cement pursuant to this subdivision shall furnish to each buyer purchasing cement for resale in the same form on or before the date the manufacturer makes delivery at the adjusted price, a written statement to read as follows:

Effective November 10, 1945, the Office of Price Administration has granted an increase of 10¢ per barrel over March 1942 prices, to manufacturers of cement in Bureau of Mines District No. 6. Any person who resells the cement in the same form is permitted to add the actual dollar-and-cents amount of this price increase to his existing maximum price for cement actually purchased at the increased price for resale in the same form.

This amendment shall become effective November 10, 1945.

mesh deduct 50 cents per net ton from the finely ground phosphate rock prices.

PART 1499—COMMODITIES AND SERVICES
[SR 14-H, Amdt. 5]

PICK-UP AND DELIVERY AND LOCAL TRANSFER
SERVICES

A statement of the considerations involved in the issuance of this amendment, issued simultaneously herewith, has been filed with the Division of the Federal Register.

Section 9 is amended to read as follows:

SEC. 9. *Establishment and adjustment of maximum rates of carriers, other than common carriers, performing pick-up and delivery or local transfer services for line-haul carriers.* The maximum charges of carriers of property, other than common carriers, engaged in "pick-up and delivery" and "local transfer" operations are established basically under § 1499.2 and other applicable provisions of the General Maximum Price Regulation. They are also subject to certain provisions for adjustment contained in the latter regulation and in Supplementary Regulation No. 15. The purpose of this section 9 is to establish a further, and supplemental, provision for individual establishment and adjustment of rates for "pick-up and delivery" and "local transfer" services.

(a) *Definitions.* As used in this section:

(1) "Pick-up and delivery services" means the local transportation of property between a terminal of a line-haul carrier on the one hand and the premises of the consignee or consignor on the other.

(2) "Local transfer service" means the local transportation of property which is moving through under line-haul carriers' published rates from one terminal of a line-haul carrier to another terminal of the same carrier or to that of another connecting line-haul carrier.

(3) "Line-haul" includes freight forwarders, express companies, and air carriers, as well as railroads, motor carriers, and water carriers.

(4) "Applicable base date" refers to services performed during March 1942 and means October 1, 1941, or the date prior to March 31, 1942 upon which the present maximum rate became effective, whichever is closer to March 31, 1942; except that if, the present maximum rate became effective after March 31, 1942 pursuant to approval of the Office of Price Administration, the date upon which such approved rate became effective is the "applicable base date".

(5) "Pick-up and delivery carrier" or "local operator" means a carrier who

performs "pick-up and delivery" or "local transfer" services for a "line-haul carrier".

(6) "Base period" means April 1, 1941 through March 31, 1942. If the service was not performed during that period the twelve-month period following the establishment of the service is the base period.

(b) *Adjustment*—(1) *When adjustment may be made.* An increase in the maximum rate for performance of "pick-up and delivery" and "local transfer service" may be approved by the Office of Price Administration in any case where, upon application filed in accordance with the provisions of paragraph (c), it is shown that:

(i) The actual cost of materials and labor used in supplying the service exceeds those costs in the "base period" by an amount so large as to threaten the continued performance of the service; and

(ii) The "line-haul carrier" cannot procure satisfactory performance of the service from applicant or from any other "local operator" at rates lower than the requested rate; and

(iii) Discontinuance of the service will result in higher transportation cost to shippers and consignees; and

(iv) The "line-haul carrier" expressly agrees to pay and absorb the requested higher rate for "pick-up and delivery" or "local transfer service", and states that it will not increase its own charges on that account. (This statement is made without prejudice to the "line-haul carriers'" right to present for consideration by any regulatory authority, the increased cost resulting from the new "pick-up and delivery" or "local transfer" rates, together with any cost increases, in any future application for a general rate increase based on revenue needs.)

(v) The requested increased rate does not exceed the limit prescribed in subparagraph (2), immediately following.

(2) *Adjustment to be allowed.* The Office of Price Administration may approve an increase in rate under this section up to a rate which will not result in a higher ratio of net income to revenue than in the "base period" or which will remove substantial hardship resulting from existing maximum rates.

(c) *Applications*—(1) *Form.* Applications for adjustment under this section shall be filed on Form OPA 383-8, or as subsequently revised, and shall contain all the information and statements called for therein.

(2) *Where to file.* Applications shall be filed directly with the Transportation and Public Utilities Division, Office of Price Administration, Washington 25, D. C.

(3) *Who may file.* Applications under this section may be filed by either the "local operator" or the "line-haul carrier".

(4) *National War Labor Board cases.* Regardless of the foregoing, if the application is based on a voluntary wage increase requiring approval of the National War Labor Board, such application must be filed within 15 days after the wage-

adjustment application is filed with the N. W. L. B.; if it is based on a disputed wage increase case, it must be filed within 15 days after the "local operator" shall have received notice of the N. W. L. B.'s proposed decision.

(d) *Approval, modifications, and effectiveness of adjustments*—(1) *Action by OPA.* Upon consideration of the application, the Administrator will issue an order denying, in whole or in part, the requested adjustment in rate, or the Director of the Transportation and Public Utilities Division will issue a notice of approval or require that additional information be submitted. If none of these actions is taken within 30 days after the filing of the application, or after additional information has been supplied, the application shall be deemed to be approved. Note, however, that all approvals—whether made by affirmative action or by operation of the 30-day provision—are subject to revocation or modification by the Administrator at any time.

(2) *Charging the adjusted rate.* An increased rate requested under this section may be charged on open billing pending consideration of the application. Collection may not be made until an order has been issued (and then only to the extent permitted thereby) or until written notice of approval by the Transportation and Public Utilities Division of the Office of Price Administration has been received, or until the 30-day period has run, as provided in paragraph (d) (1) above. Increased rates based on wage increases requiring approval by the National War Labor Board may be charged on open billing pending consideration of the application but may not be collected until receipt of written notice of approval by the Office of Price Administration after the wage increase is made finally effective.

If any charge not permitted by this section is collected by the "local operator" pending consideration of the application by OPA, such collection constitutes a price violation of this regulation.

(3) *Effective date of adjusted rate.* Notices of approval shall provide a definite effective date for application of the adjusted rate. The effective date will be a date within the 30-day period after filing, or, in an appropriate case, a date expressly agreed upon by the "line-haul carrier" and the "local operator" as set forth in the application as the date for effectiveness of the adjusted rate.

In cases where the requested rate is deemed approved through operation of the 30-day rule (paragraph (d) (1)), the effective date shall be the date on which the 30-day period expires.

The adjusted rate may not in any case be applied to services performed prior to the effective date as thus determined.

(e) *Successors may use predecessor's rate.* The maximum rates of a "local operator" for a given "pick-up and delivery" or "local transfer" service having been established pursuant to OPA regulations (or adjusted pursuant to this section), those rates may continue to apply as the lawful maximum rates for those services performed by any trans-

ferree, subcontractor, or other carrier who may succeed to and operate that service. This rule applies regardless of whether there is a formal purchase of business and assets, etc., as between the "local operators", or whether the successor is merely a "replacement" supplying the service which has been abandoned or discontinued, for any reason, by the preceding "local operator."

(f) *Establishment of new rates.* In any instances where there is no existing maximum price for a particular service, application may be made on OPA Form 383:8 in accordance with the procedure described above, using estimated expenses and revenues in lieu of actual expenses and revenues, or previously established maximum rates for similar services.

(g) *Establishment of area maximum rates.* The Administrator may consolidate individual applications or undertake an investigation on his own motion and by general order issued under this section, prescribe maximum rates to apply to all pick-up and delivery carriers in a given city or other area.

This amendment shall become effective November 10, 1945.

NOTE: All reporting requirements of this Amendment have been approved by the Budget Bureau in accordance with the Federal Reports Act of 1942.

Issued this 6th day of November 1945.

Administrator.

PART 4003—SUPPORT PRICES; SUBSIDIES DRY EDIBLE BEANS, 1945 CROP

No. 2, provided they grade U. S. No. 3 off-color or better. The subsidy payments shall be in the amounts by which the support prices for such beans exceed the applicable Office of Price Administration maximum prices on such beans sold into civilian trade channels. This directive shall not affect the payment of subsidies on beans grading U. S. No. 2 or better in accordance with Directive 67 (10 F.R. 8750), issued by the Economic Stabilization Director.

§ 8313.2 *Purpose and Scope.* The purpose of this part is to provide a fixed price policy for used standard general purpose machine tools and machines. Prices at decreasing percentages of original cost are specified for machinery in active use through twenty-five years, and ceiling prices are provided for sales of machinery with more than twenty-five years of active use. This part applies to all sales made after the effective date hereof by the Reconstruction Finance Corporation as a disposal agency and to all sales by owning agencies of standard general purpose machinery pursuant to Surplus Property Board Regulation 6 (10 F.R. 6309, 6981, 8665, 10398) or other wise but is not applicable to any sale of standard general purpose machinery which has been delivered to the purchaser or to any carrier for the account of the purchaser prior to the effective date of this part.

§ 8313.3 *Machinery used not more than twenty-five years.* Machinery in active use for not more than twenty-five years shall be sold at prices determined as follows:

(a) The selling agency shall determine the original price, (i. o. b. the plant of the machine manufacturer) of the machine including electrical equipment, standard or special attachments sold with the machine, and attached special tooling which has value to the purchaser other than as scrap or salvage. In the case of machine tools and metal forming and shaping machines manufactured prior to March 1, 1941, the March 1, 1941 price of the nearest equivalent machine may be taken as the original price. In the case of standard general purpose machines, other than machine tools and metal forming and shaping machines, manufactured prior to October 1, 1941 the October 1, 1941 price of the nearest equivalent machine may be taken as the original price.

(b) The selling agency shall determine the period of active use of the machine on the basis of the best information reasonably available. The period of active use shall be considered to run from the estimated date the machine was originally put into use to the date of sale, if the machine is then still in use. If the machine is not in use at the time of sale, the period shall run to the estimated date when the machine last became idle.

(c) The original price determined in accordance with paragraph (a) shall be used as a base. The price at which the machine shall be sold shall be computed by applying to that base the percentage appearing in paragraph (d) below opposite the period of active use of the machine calculated in accordance with

paragraph (b). The percentage appearing in Column B of paragraph (d) shall be applied where the buyer is the person who is using the machine at the time of sale or, if the machine is then idle, the person who last used it, and the percentage appearing in Column A shall be applied where the sale is to any other buyer. The price computed in accordance herewith shall be the sales price f. o. b. the location of the machine at the time of sale, except that in the case of sales made to a purchaser in possession, it shall be the sales price of the machine at its location.

(d) The percentages of original cost to be applied are as follows:

FEDERAL POWER COMMISSION.

[Docket Nos. G-507, G-508]

HOPE NATURAL GAS CO. AND NEW YORK STATE NATURAL GAS CORP.

NOTICE OF PETITIONS FOR MODIFICATION OF ORDER ISSUING CERTIFICATES OF PUBLIC CONVENIENCE AND NECESSITY

NOVEMBER 5, 1945.

Notice is hereby given of the several petitions of New York State Natural Gas Corporation ("New York State Company" and "Petitioner"), a corporation organ-

ized under the laws of the State of New York with its principal place of business at 30 Rockefeller Plaza, New York, New York; and Hope Natural Gas Company ("Hope" and "Petitioner"), a corporation organized under the laws of the State of West Virginia with its principal place of business at 445 West Main Street, Clarksburg, West Virginia, filed with the Federal Power Commission on October 11, and October 30, 1945, respectively, requesting modification of paragraph (C) of the Commission's order of April 26, 1944, issuing to petitioners certificates of public convenience and necessity pursuant to section 7 of the Natural Gas Act, as amended, in the matters of Hope Natural Gas Company, et al., Docket Nos. G-507, G-508, G-510, G-516, and G-519, Opinion No. 114.

Paragraph (C) of the Commission's order of April 26, 1944, reads as follows:

(C) Until further order of the Commission, the facilities herein authorized shall be operated exclusively for the purpose of enabling Hope Natural Gas Company and New York State Natural Gas Corporation to supply the natural-gas requirements of the following-named customers of New York State Natural Gas Corporation in accordance with the terms and provisions of existing contracts covering the sale and delivery of such requirements, limited, however, to the maximum annual quantities of natural gas set forth in the following tabulation:

	Annual volume (m.c.f.)
New York State Electric & Gas Corp.	1,900,000
Central New York Power Corp.	3,300,000
Empire Gas and Fuel Co. (Pa.)	303,750
Godfrey L. Cabot, Inc.	592,750
North Penn Gas Co. and Allegany Gas Co.	1,531,250
Penn.-York Natural Gas Corp.	1,718,000

In its petition filed October 11, 1945, New York State Company requests the Commission to modify the limitation imposed by paragraph (C) of the order of April 26, 1944, upon the sale and delivery of natural gas to Empire Gas and Fuel Company. The petitioner requests that the limitation be modified in such manner as to permit petitioner to increase from 303,750 Mcf to at least 669,000 Mcf the maximum annual quantity of natural gas deliverable to Empire Gas and Fuel Company.

The present limitation of 303,750 Mcf on the maximum annual quantity of natural gas deliverable to Empire Gas and Fuel Company is the total of the daily deliveries provided for in New York State Natural Gas Corporation Rate Schedule FPC No. 19; that is, 1,000 Mcf per day during the months of January through April and 750 Mcf per day during the other eight months of each year. In its petition, New York State Company states that on September 6, 1945, it entered into a supplemental agreement with Empire Gas and Fuel Company which would amend New York State Natural Gas Corporation Rate Schedule FPC No. 19, and provide for the delivery by New York State Company to Empire Gas and Fuel Company of an additional quantity of 1,000 Mcf per day after January 1, 1946. The supplemental agreement further provides that December deliveries beginning December 1, 1945, are to be 1,000 Mcf per day instead of 750 Mcf

and April deliveries thereafter will be 750 Mcf per day instead of 1,000 Mcf.

The supplemental agreement, New York State Company states in its petition, was entered into at the instance and request of Empire Gas and Fuel Company to meet anticipated requirements of that company. The change or increase in quantity, the petitioner states it has been advised, will enable Empire Gas and Fuel Company to sell an additional quantity of gas to Empire Gas and Fuel Company, Ltd., and the receipt thereof by that company will offset anticipated declines in its own production and purchases from its affiliate, the Empire Producing Corporation, and from local producers, and thus make possible adequate service to consumers.

In its petition filed October 30, 1945, Hope requests the Commission to modify the limitation imposed by paragraph (C) of the order of April 26, 1944, so as to permit the petitioner to sell and deliver to New York State Company such additional quantities of natural gas as to enable New York State Company to meet the requirements of Dampscroftown Gas Company, 304,000 Mcf per year,¹ and the additional requirements of Empire Gas and Fuel Company hereinbefore referred to.

In its petition, Hope states that it is presently selling natural gas to New York State Company pursuant to an agreement of November 1, 1943, Hope Natural Gas Company Rate Schedule FPC No. 9, which agreement provides in part that Hope will deliver and sell natural gas to the New York State Company in quantities varying between 14,000,000 Mcf per year and 6,000,000 Mcf per year. Hope, in the petition, further states that it believes the limitation imposed by paragraph (C) of the Commission's order of April 26, 1944, is designed to curb the marketing operations of New York State Natural Gas Corporation and is inapplicable to Hope as such, and that any limitation on Hope should be based upon its own contractual relation with New York State Company.

Hope requests the Commission to modify paragraph (C) of the order of April 26, 1944, in such manner as to permit Hope to supply the natural-gas requirements of New York State Company in accordance with the terms and provisions of the existing contract between the com-

¹On October 16, 1945, New York State Natural Gas Corporation, Docket No. G-503, filed with the Federal Power Commission an application for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, as amended, for authority to deliver and sell to Dampscroftown Gas Company natural gas to be transported through the facilities authorized by the Commission by the order of April 26, 1944.

On October 3, 1945, Dampscroftown Gas Company, Docket No. G-670 filed with the Federal Power Commission an application for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, as amended, for authority to construct and operate facilities for the purpose of transporting natural gas to be purchased from New York State Natural Gas Corporation and selling such gas at wholesale and retail in the counties of Clarion, Venango and Forest, all within the State of Pennsylvania.

panies and up to the maximum quantity of 14,000,000 Mcf per year.

Any person desiring to be heard or to make any protest with reference to said petitions should, on or before the 20th day of November, 1945, file with the Federal Power Commission, Washington 25, D. C., a petition or protest in accordance with the Commission's provisional rules of practice and regulations under the Natural Gas Act.
